

# ALAMO VIDEO WITNESS

Alamo Video Witness is the pairing of your Alamo Alarm security system with video clips of what caused the alarm. Video helps remove the guessing games of what caused the system to go into alarm, which allows for quick and direct police dispatch.

When your alarm is activated an operator receives your alarm signals as well as video from the alarm event. The operator can view your premise during the alarm and view a video clip of what caused the alarm. Simultaneously you can receive the same alarm information and video from the event. Additionally there is a button for you to call the central station to confirm or cancel the alarm if you choose to.

**Now you and the operator can know what caused the alarm.**

## Why Alamo Video Witness?

- A burglary occurs every 14.6 seconds. FBI.gov
- Alamo Video Witness gives the operator additional information to help the police better prioritize their response
- Alamo Video Witness helps reduce false alarms by ensuring the operator sees the presence of a person at the sight of the alarm
- A crime in progress can be determined by Alamo Video Witness, which can allow for a faster response

## ALAMO VIDEO WITNESS - HOW IT WORKS

*Alamo Video Witness provides the operator with additional information about what caused the alarm*

1. When the system goes into alarm – alarm signals and video of what caused the alarm are sent to the central station
2. The operator reviews the alarm signals and video (clips and live views if available) and contacts the customers responsible parties
3. If the operator and / or the responsible parties believe a crime is in progress the operator can give descriptions of the incident and individuals seen in the video to the police

**OUR MISSION:** Is to provide genuine security, through attentive service, quality installations, and products that best fit the security needs of our customers and the community.

Alamo Alarm Company, Inc. has been providing quality installation and service to the Central Valley since 1980. It is our commitment to give you the service of a local company and the strength of a leader in the security industry. We look forward to the opportunity of being able to discuss your specific security needs. If you have any questions or need any further information, please contact us.

*The Central Station Alarm Association International (CSAA) is an internationally recognized non-profit trade association.*

This service meets and exceeds the CSAA ANSI Standard ANSI/CSAA CS-V-02-2012 for video verification of burglar alarms. Video Verification is the pairing of video data with alarm events generated from protected premises.
